The Roller for Spring Use.

As the season is approaching when the roller should be brought into service, permit me to call the attention of the readers of the Farmer and Gardener to its use. The time was, when, if a farmer possessed one plow and a heavy toothed harrow, he was equipped for cultivating the soil; but that time has passed away, and thorough agriculturist the roller is now almost as indispensable as the plow.

The first use for the roller in the spring of the year is to smooth down the inequalities of the mowing ground, and settle the earth around the grass roots which have been loosened by the frosts. All mowing ground should be rolled as early as the ground gets settled, so that the cattle can pass over it without sinking their feet into it.

The oats ground should be rolled immediately after the harrow or drill. It is quite an advantage to the crop, and greatly facilitates harvesting, particularly if the oats should fall.

Another and one of the most important uses of this valuable implement is to crush the clods after ploughing the oats stubble, and I have always found it best to have the roller follow plow pretty closely, as the clods crush much more easily then, than after they have been exposed to the sun.

In preparing the ground for wheat, the roller should be used repeatedly, or so long as any clods remain, and by all means let the ground be rolled before the drill. No field is in complete order for drill-seeding without it.

Cultivation of Corn.

As the farmers will soon be called upon to prepare for corn planting and cultivation, a word or two on the subject, based upon practical experience may not prove uninteresting to some of your readers.

My plan is as follows:—I plow the ground in the fall to the depth of six or eight inches.—I then prepare a rich compost of hog manure and good loam. In the Spring I turn my compost heap thoroughly, so as to have it well incorporated.

I harrow the ground once with a heavy spike harrow, and afterwards harrow or pulverize with a large four horse cultivator, working it both ways. The use of the spike harrow is then continued until the ground is perfectly mellow.

The ground is marked out four feet each way, and a shovel full of the compost already referred to, divided between these hills, or I apply about four table spoons full of Baugh's Raw-bone Phosphate to each hill. From six to eight grains are planted in the hill. When the plants have attained the height of four inches, I weed out to four stalks to a hill, and keep the ground mellow with the cultivator.

By this simple method I have increased my corn crop from fifty to seventy bushels to the acre. This increase I attribute to two causes. First the deep ploughing and thorough pulverization, and second, to the application of the compost or fertilizer. The young plants start at once and vigorously. Having something to feed upon, and a well prepared soil for the roots to penetrate, the wire worm is headed off, and the birds are not so likely to disturb the grains as when the germination is slow.

Starting Seeds Early.

Rev. Daniel Emerson, Summit county, O. states that he has been successful in giving garden seeds an early start in the following manner:

Having selected the quantity needed, each sort is tied up by itself in a cloth, the name being written on a slip of paper, and enclosed with the seed. The packages are then buried about two inches deep in the ground for a week or two. When ready to plant, the kinds needed for planting are taken from the bags and used. They will be found to have swelled, perhaps sprouted, and ready to grow if the ground should be quite dry, it is best to water the drills after dropping the seed, and then cover with dry earth. Mr. E. says by this plan he has never failed to raise plants from every seed planted. If each seed is placed where it is wanted to grow, it will save the labor of thinning, though many prefer to thin their rows, leaving the most prominent plants to grow.

Planting Tomatoes.

A correspondent of the Gardener's Chronicle (Eng.) strongly recommends the growing of tomatoes wholly in pots, especially by those who raise only a limited supply of a dozen or two plants for home use. He also thinks market gardeners, and those living in cities, would find this mode invaluable. The pots-plants are entirely under control, and require almost no attention.—He says:

"I have planted out tomatoes for the last five years, but have had instead of good crops from plants in pots, with no trouble in training, or stopping, and no failure as to production or ripening. I sow the seed in a No 60 pot at the end of February. The plants are kept starting under glass till the middle of April, then shifted into thumbs, and put on the potting-bench for a week. They are then potted together under a warm frame, and when they want it, are shifted into 60's and allowed to get quite pot-bound."

Beans and Indian Corn for Milk Cows.—R. H. Brown of Greene, informs us that he fed his cows, early this spring, with three pints each per day of Indian Corn and white beans ground together in equal parts. He never had his cows do so well on any other food.

MORSE'S INDIAN ROOT PILLS

Above we present you with a likeness of DR. MORSE—the inventor of MORSE'S INDIAN ROOT PILLS. This philanthropist has spent the greater part of his life in traveling, having visited Europe, Asia, and Africa, as well as North America—has spent three years among the Indians of our Western country—it was in this way that the Indian Root Pills were first discovered. Dr. Morse was the first man to establish the fact that all diseases arise from IMPURITY OF THE BLOOD—that our strength, health and life depended upon this vital fluid.

When the various passages become clogged, and do not act in perfect harmony with the different functions of the body, the blood loses its action, becomes thick, corrupted, and diseased; thus causing all pains, sickness and distress of every name; our strength is exhausted, our health we are deprived of, and if nature is not assisted in throwing off the stagnant humors, the blood will become choked and cease to act, and thus our light of life will forever be blown out. How important, then, for the blood to keep the various passages of the body free and open. And how pleasant to us that we have it in our power to put a medicine in your reach, namely, Morse's Indian Root Pills, manufactured from plants and roots which grow around the mountainous cliffs in Nature's Garden, for the best of us keep the pores of the skin, and assists Nature in throwing out the finer parts of the corruption within. The second is a plant which is an Expectant, that opens and unclogs the passage to the lungs, and thus, in a soothing manner, performs its duty in throwing off phlegm, and other humors from the lungs by copious spitting. The third is a Diuretic, which gives double ease and strength to the kidneys; thus encouraged, they draw large amounts of impurity from the blood, which is then thrown out beautifully by the urinary or water passage, and which could not have been discharged in any other way. The fourth is a Cathartic, and accompanies the other properties of the Pills while engaged in purifying the blood; the coarser particles of impurity which cannot pass by the other outlets, are thus taken up and conveyed off in great quantities by the bowels.

From the above, it is shown that Dr. Morse's Indian Root Pills not only enter the stomach, but become united with the blood, for they find way to every part, and completely root out and cleanse the system from all impurity, and the life of the body, which is the blood, becomes perfectly healthy; consequently all sickness and pain, and even death, can be cured, and the system remain when the body becomes so pure and clear.

The reason why people are so distressed when sick, and why so many die, is because they do not get a medicine which will pass to the afflicted parts, and which will open the natural passage for the disease to leave the body; hence, a large quantity of food and other matter is lodged, and the stomach and intestines are literally overflowing with the corrupted mass; thus undergoing a disagreeable fermentation, constantly mixing with the blood, which throws the corrupted matter through every vein and artery, until life is taken from the body by disease. Dr. Morse's PILLS have added to themselves victory upon victory, by restoring millions of the sick to blooming health and happiness. Yes, thousands who have been racked or tormented with sickness, pain and anguish, and whose feeble frames have been scorched by the burning elements of raging fever, and who have been brought, as it were, within a step of the silent grave, now stand ready to testify that they would have been numbered with the dead, had it not been for this great and wonderful medicine, Morse's Indian Root Pills. After one or two doses had been taken, they were astonished, and absolutely until life is taken from the body by disease.
